

Doyle Sheet Cleaners Solve Dust Problems

For Commercial and Specialty Printers

- Clean stock means less downtime and waste
- Used by manufacturers of books, lottery tickets, flooring, credit cards, and aseptic packaging – anywhere dust is a problem
- Extremely effective in UV curing applications

For Package Printers

- Attain high-quality printing, even when running recycled stock
- Remove paper fiber and coating dust due to slitting recycled and SBS stocks
- Less waste and reduced wash-ups
- Cleaning your stock will satisfy your most critical customers
- Clean paperboard, corrugated cardboard, preprint linerboard, aseptic packaging, and plastic

For Coaters and Laminators

- Effectively cleans before coating and laminating
- Quiet exhausters with sound levels between 70 and 85 dbA
- Efficient collection with a cyclone dust collector

Demonstrating Effectiveness

■ This picture shows the blanket after running approximately 500 sheets through the press. Maximum powder had been applied to the sheets and the Doyle System is turned off.

Results = Longer Run Times Between Wash-ups

■ These are the results with the same conditions as above but the Doyle System is turned on.

For over 80 years, Doyle® Systems has manufactured the leading sheet and web cleaning systems.

- All stainless steel construction
- Low-maintenance, refillable brushes
- Quiet exhausters with efficient collection
- Precision engineering customized to your application
